

CLAIM CPE/CPD CREDITS WITH IMMERSIVE LABS

Immersive Labs provides businesses with metrics to visualize the strengths and weaknesses of their human cyber capability. Our platform gives a full picture of the cyber skills across an entire organization, and maps this to recognized frameworks for more relevant strategies, benchmarking, and budgeting.

On an individual level, you can now evidence the time spent completing labs in CPE/CPD credits. These can be used to maintain relevant certifications.

WHAT ARE CPE/CPD CREDITS?

Continuing Professional Education (CPE) or Continuing Professional Development (CPD) credits are necessary for a range of professional qualifications, to illustrate that someone has maintained their competence in a particular field. Credits are commonly earned through workshops, conferences, and other industry events.

Immersive Labs aligns skills to specific threats with continually updated content. Enabling constant upskilling in this way makes Immersive Labs an ideal source of CPE credits.

WHO IN A BUSINESS WOULD REQUIRE CREDITS?

Anyone who has a relevant CPE certification must gain additional credits each year in order to maintain their certification. For example, a Certified Information Security Systems Professional (CISSP) certificate holder will need to earn 40 CPE credits each year to maintain it.

HOW DO YOU EARN CREDITS THROUGH IMMERSIVE LABS?

The estimated time it takes to finish a lab counts towards your CPE credits. You'll earn one credit for every hour of estimated time on completed labs.
