

# Get More Done With Wrike

## All-in-one collaborative work management solution for leading productive teams

Achieving success means rising above the competition. A big part of this involves building a collaborative work environment that aligns company visions with individual activities. Whether you're managing complex projects, measuring work performance, or sharing information with teams, Wrike helps you manage workflows securely at scale, turn strategies into actionable plans, and drive operational excellence.

## Powerful, simple work management

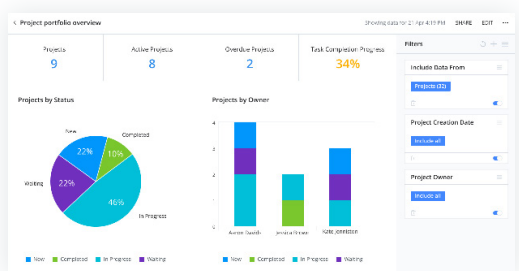

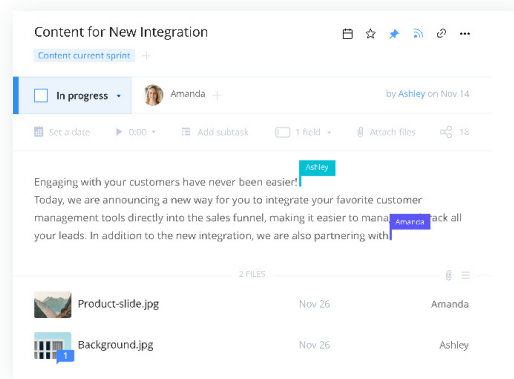

Cloud-based enterprise project portfolio management software helps teams plan, manage, and complete projects:

- Automate processes for just one project or a thousand, you can streamline how your teams work today and grow their needs.
- Interactive Gantt Charts let you see project progress and keep everyone on the same page.
- Mobile apps for iOS and Android allow you to access and update your projects any time, anywhere.

## Seamless collaboration

Break down silos and bring your teams together, regardless of where they are:

- Built-in communication and editing tools foster teamwork and productivity; reduce risks and wait time.
- An all-encompassing platform provides a single source of truth so your teams always have the most up-to-date information on every task and every project.
- Activity notifications and clear role assignments provide instant visibility into project status and accountability.

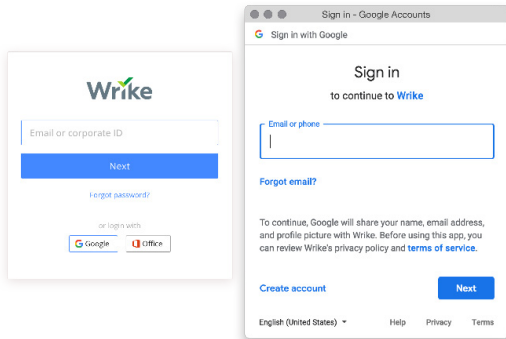

## Truly understand your organization

Powerful visualization of team and project performance to facilitate faster and smarter data-driven decisions

- Advanced reports and analytics dashboards bring deeper visibility into work and make data more digestible and meaningful for stakeholders.
- Connect your essential business tools to Wrike and make it your project control center.
