

Creating a digital world
your customers can trust

The need for modern solutions, like remote project management and teleconferencing, that enable distributed workforces to remain productive has recently accelerated. Government organizations have a greater need for flexible, scalable digital systems and operations, making these challenges more critical than ever. A clear, well-planned digital strategy to adopt new processes and upgrade legacy systems and tools enables organizations to meet ongoing demands and add capabilities to meet future needs, both within budget and without disruptions.

Digital.ai Government Cloud Platform

End-to-end AI-driven platform to orchestrate the delivery of software-driven organizational value

Plan	Secure	Test	Release/Deploy	Analyze
 <p>Enterprise agile planning</p> <p>Strategize to develop and deliver software faster</p>	 <p>Application security</p> <p>Protect your businesses and customers</p>	 <p>Continuous automated testing</p> <p>Increase quality and user experience</p>	 <p>Software delivery</p> <p>Release orchestration and deployment automation</p>	 <p>AI-powered analytics</p> <p>Insights to accelerate innovation and drive efficiency</p>

Deliver secure and compliant software innovations faster

Digital.ai enables Government Agencies to align software delivery to their goals and map organizational value to stakeholder requirements. Our intelligent platform provides end-to-end connectivity and visibility across the entire development process from idea to production, enabling Government Agencies to make informed decisions and achieve measurable results. With Digital.ai, Government Agencies can prioritize products, processes, and tasks based upon the value they deliver to their stakeholders.

With Digital.ai Agility, we now have the ability to place a greater focus on delivering software, managing processes, and orchestrating the flow of work. Standardizing our workflows has given our teams visibility through a single lens into the real-time work as it goes through each of our pipelines and the value it delivers to the customer.

- U.S. Department of Veteran Affairs

Only Digital.ai provides:

Alignment and connectivity between development, operations, and organizational outcomes

Clear line of sight across development and delivery processes to provide sustained value to customers

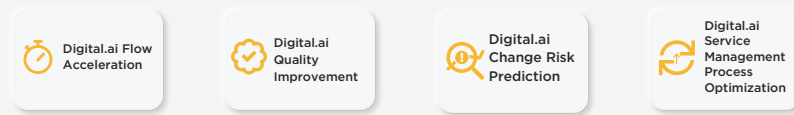

Contextual insights to define how deliverables are measured and relate to overarching goals

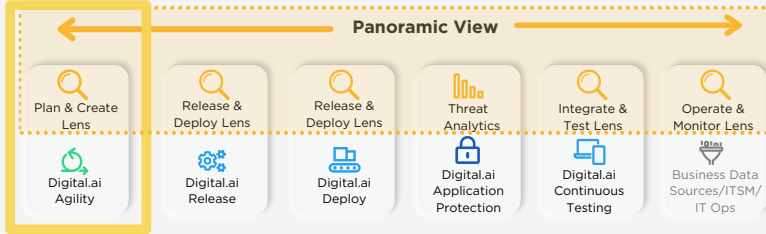

Interoperability with existing tools and processes — no rip and replace

Digital.ai Government Cloud Platform features:

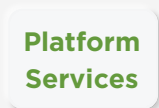

Intelligence

Orchestration

Shared Services

DevOps Value Stream Delivery

AI-powered analytics solutions enable organizations to predict and prevent issues that reduce software delivery reliability, efficiency, and customer experience

DevOps Value Stream Management

Integrated enterprise agile planning, DevOps, application protection, and testing solutions for frictionless software delivery

Panoramic insights align software to business goals, optimize processes, and deliver business and customer value

Shared Services

AI and analytics engine, unified analytical model and data lake, third party integrations, and shared services

Digital.ai Government Cloud is FedRAMP Authorized

Digital.ai Agility is an enterprise agile planning solution that enables agencies to scale beyond team-level agile practices, improving visibility across the organization.

Why Digital.ai

Transformative

Map organizational objectives and requirements to software deliverables and manage the development lifecycle from end to end

Secure

Embed protection in every system you create and ensure both governance and compliance

Intelligent

Turn data into insights to make intelligent decisions, allowing teams become more efficient
