# Instantly Monitor the Cybersecurity Health of Your Agency, Contractors, and Third Parties

17 of 24

CFO Act agencies received a **C** or **lower**

for IT management on the FITARA scorecard. The Federal Information Security Management Act (FISMA), requires all federal agencies, state agencies that manage federal programs, and contractors to implement information security controls based on NIST guidance.
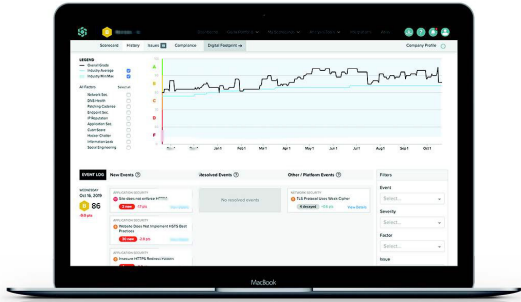

How Secure is Your Ecosystem?

Government agencies and our nation's critical infrastructure—such as energy, transportation systems, communications, and financial services—are dependent on information technology (IT) systems and electronic data to carry out operations and to process, maintain, and report essential information. Yet, it is often difficult to answer the question, **how secure are we and our supplier ecosystem?**

SecurityScorecard enables security teams to exceed their mission objectives by identifying how susceptible they are to breaches and ex-filtration of personally identifiable information (PII), national security data, and their most important digital assets. With visibility into the risks posed by their third parties' access to networks, **SecurityScorecard** gives agencies the continuous insight they need into the security posture of their entire ecosystem.

Accurate & Actionable Security Ratings for Government Agencies to Succeed in Their Mission

SecurityScorecard uses non-intrusive proprietary data collection methods, as well as trusted commercial and open-source threat feeds, to quantitatively evaluate the cybersecurity posture of any organization. SecurityScorecard is the only provider of risk ratings that automatically map to vendor cybersecurity questionnaire responses - **providing a true 360˚ view of risk.** The **SecurityScorecard** Platform is leveraged by government agencies and their contractors to provide timely and comprehensive information about their overall security posture.

Key Benefits

Achieve your Mission Securely

Leverage high-level dashboards, detailed reports, and historical performance data to demonstrate your cybersecurity hygiene, how it's changed over time, and how you're in compliance with ongoing monitoring. Map security ratings to over 25 regulatory frameworks, enabling you to maintain and monitor specific controls.

Collaborative Remediation

SecurityScorecard uses an A-F rating scale, so that agencies can easily understand, communicate, and improve their cybersecurity posture with non-technical audiences and their contractors. SecurityScorecard allows you to onboard your third parties with our free and frictionless invited vendor experience.

Continuous 360˚ Visibility

Gain an objective view of risk to easily identify and prioritize internal vulnerabilities and high-risk third parties for assessment and remediation, ultimately leading to a more secure environment. Automatically map Ratings to industry standard questionnaire responses in Atlas—such as CMMC and NIST—providing an objective view of risk.

Our Product Suite

Security Ratings	Instantly rate, understand, and monitor security risk.	**Atlas** Send & validate cybersecurity assessments	**Security Data** Leverage actionable cybersecurity data across your ecosystem.
APIs & Integrations	Embed SecurityScorecard Ratings and Atlas into your existing workflows.	**Professional Services** Scale your agency's impact with guidance from industry experts.

One Platform, Many Use Cases

Oversight

Increase visibility of regulated entities and improve risk-based oversight by prioritizing the most vulnerable organizations and the areas of greatest concern. Work proactively and collaboratively with private sector entities to identify and mitigate vulnerabilities in real-time.

Self-Monitoring

Meet mission objectives and ensure proper cybersecurity hygiene by effciently validating and remediating your organization's security issues. Reduce your reputational risk in an automated way and maintain trust in your agency.

Compliance

Enable cybersecurity compliance, audit remediation, and attestation with evolving regulations and government mandates. Assess your vendors with industry standard cybersecurity questionnaire templates instantly mapped to ratings data, enabling actionable program insights.

Third-Party, Supply Chain, and Regulatory Risk Monitoring

Take control of third-party risk and work collaboratively to improve the cyber health of your entire ecosystem. Work collaboratively to proactively identify risks for regulated entities. Continuously monitor any organization instantly through the world's largest database of over 10 million continuously rated organizations.

Stakeholder Reporting

Effectively communicate your cybersecurity strategy, showcase your strengths, and demonstrate your third-party ecosystem's hygiene with the ability to generate instantaneous stakeholder reports.
