URBANSDK
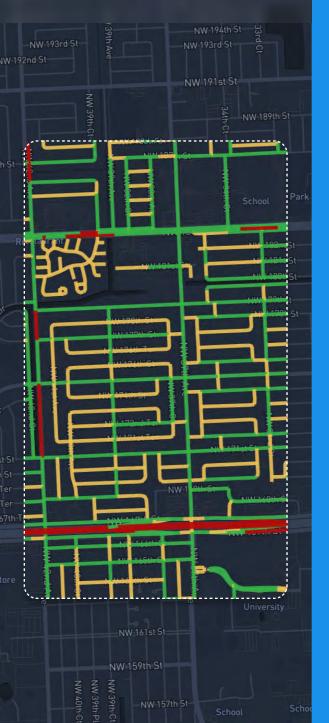

Monitor speeds on all local roads

🚗 Traffic Speeds

Quickly analyze speeds to respond to public complaints, prioritize street safety, and measure the effectiveness of traffic calming measures.

METRICS

- 85% Speeds
- 95% Speeds
- Average Speeds
- AM/PM Peaks

USE CASES

Public Complaints: Quickly respond to speeding complaints and provide concerned citizens with an analysis of the street in question. Adjust months of your report depending on when complaint ws lodged

Traffic Calming: Immediately determine if a road falls within traffic calming parameters and justify the need for intervention. Speed up your calming operations immediately pinpointing areas of concern

Post-Implementation Studies: View streets where calming measures have been implemented, as well as all the tangential roads and road segments. Enjoy a complete view of area that has been impacted

Reporting to Council: Report to council more clearly and concisely so they understand past, current, and upcoming projects. Print PDFs of reports and/or share embedded maps on your website
