YOUR UNIT'S MOST TRUSTED PARTNERSHIP

When the field is merciless, the terrain is impassable and your communications are of the utmost importance you need a reliable network solution that is backed by a trusted partner. That's why Rebel Systems is proud to work exclusively with SCATR, the world-leader on information protection.

SCATR

SAFE TRANSIT NO MATTER THE FIELD.

Rebel Systems is proud to partner with SCATR, a leading edge provider of secure transit software solutions. The world's best field connection has met the world's best privacy protection.

SCATR

Secure Transit through Untrusted Networks (STUN) is the only ZERO Trust Transit software solution specifically designed to safeguard your data as it transits through Zero Trust environments, providing peace of mind in an increasingly vulnerable digital landscape, affording end-to-end Transportation Security (TRANSEC).

RESILIENCY

STUN provides the true diversification of transport through our patented auto-fail-over technology allowing users to never go without connectivity, even in the most austere of environments.

Bandwidth

Leverage all communication pathways available to provide optimized throughput for all STUN enabled transmissions.

UNRIVALED PROTECTION

STUN directly addresses the challenges in today's complex environments. Traditional communications pathways and VPN solutions leave a distinct digital signature. STUN's disruptive approach not only avoids exploitation but also provides enhanced obfuscation, resiliency, bandwidth optimization, and security.
