

Managed EDR for Linux

Get enterprise-grade Linux protection without the complexity and headaches.

Huntress Managed EDR for Linux is purpose-built protection designed specifically for today's Linux endpoints. Our Linux-native agent uncovers hacker tradecraft like web shells, footholds, reverse shells and more, and threats like cryptominers, rootkits, and ransomware that other EDRs miss. But detection alone isn't enough—our 24/7 AI-assisted SOC and threat hunters investigate deeply, cut through the noise, and respond fast to stop real threats. Our experts handle the tech, the threats, and the takedown so you can focus on running your business, not defending the infrastructure behind it.

What You Get

Stay ahead of Linux threats

Our purpose-built Linux agent and detections are made to keep pace with ever-evolving threats, surfacing the attacks hackers hope you miss and others overlook.

Expertise without the overhead

Get protection that's built, managed, and run by experts who understand how Linux threats operate—and how to stop them.

Always-on detection and response

Our 24/7 AI-assisted SOC and team of threat hunters have eyes on your Linux endpoints, digging into suspicious activity, thinking like attackers, and uncovering real threats before they cause real damage.

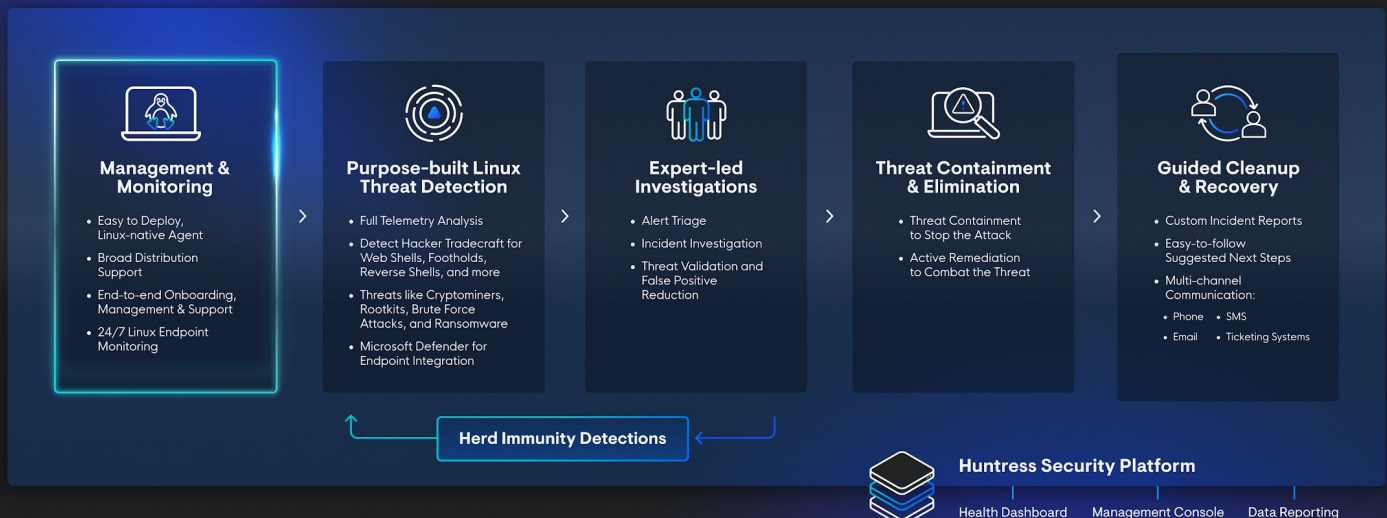

Action that stops attackers

Whether we act on your behalf or guide your team, threats are neutralized fast before hackers can wreak havoc on your business.

Real value without the worry

Simple, predictable, and affordable pricing that includes the tech, experts, and 24/7 monitoring, detection, and response that gives you peace of mind that you're protected.

Huntress 24/7 AI-Assisted SOC

Huntress levels the playing field against Linux threats

	Linux First. Not An Afterthought.	Wrecking Real Threats	Action, Not Just Alerts.	Enterprise-Grade Protection Without the Price Tag.
Huntress	<p>✓</p> <p>We built Linux EDR from the ground up for our SOC and threat hunters to find and wreck hackers.</p>	<p>✓</p> <p>Fully managed by Linux experts. We own the tech and the 24/7 threat detection and response. Alert triage and review by humans.</p>	<p>✓</p> <p>We don't just notify you, we act. From fast containment to guided remediation, we help shut threats down and make sure they don't come back.</p>	<p>✓</p> <p>One flat, transparent price for complete 24/7 Linux protection. No upsells or hidden fees. Just real value and next-level outcomes.</p>
Other EDRs	<p>✗</p> <p>Adds Linux as an afterthought and tools weren't purpose built.</p>	<p>✗</p> <p>False positives and irrelevant alerts. No context, no clarity. You're stuck sorting the noise while real threats go unchecked.</p>	<p>✗</p> <p>Sends alerts, then steps back. You're left figuring out what's urgent, what's noise, and what to do next.</p>	<p>✗</p> <p>Looks cheap up front until response, support, and visibility cost extra. Suddenly that "low price" comes with a high price.</p>

Huntress Managed EDR By the Numbers

4.5M+ Endpoints Protected
 8-minute Mean-time-to-respond
 <1% False Positives
