

# POWERSTRUX™

## PowerStrux™ Suite of Tools

Meet all NIST 800-53 AU-2 requirements for your standalone air gapped systems with:

**PowerStrux Windows Auditor**  
**PowerStrux Linux Auditor**  
**PowerStrux Active Directory Auditor**

### The Benefits of our PowerStrux Tools

**FULL AU-2  
COVERAGE**

Meet all NIST 800-53 AU-2 requirements, ensuring regulatory alignment and reducing compliance gaps.

**DATA  
TRANSFER/  
PRINT LOG**

Tracks data movement with clear, actionable reporting, for enhanced visibility.

**SCAP  
REPORTING**

Evaluate systems against STIG security standards and highlight non-compliance with remediation steps.

**TIME &  
EFFORT  
SAVINGS**

Significantly reduce the time and effort required for system auditing, freeing up resources.

**EASY POINT  
& CLICK  
EXECUTION**

Simplify system audits with intuitive tools that cater to both technical and non-technical users.

POWERSTRUX™

# PowerStrux™ Suite of Tools

**PowerStrux** is a suite of continuous monitoring tools designed to safeguard essential data. It covers Microsoft Windows, Microsoft Active Directory, and Red Hat Enterprise Linux, delivering customized solutions for overseeing the health and user activities on isolated information systems.

**PowerStrux** was developed by SecureStrux, an organization that provides specialized services in the areas of compliance, vulnerability management, cybersecurity strategies, and engineering solutions to the DoD/DoW.
