

Ransomware stops business. Huntress keeps it going.

You don't need an unexpected crisis.

Covering every ransomware attack vector is hard. Phished employees, stolen credentials, and exposed remote access give threat actors exactly what they need: access. Huntress protects every entrance.

The Huntress Security Platform secures your employees, identities, and endpoints, and provides broad visibility across your network, so you don't have to worry about data encryption, device lockouts, extortion, and business disruption.

Imagine: it's 2am and an attacker finds an opening on an endpoint exposing RDP. Attackers move fast as the clock is ticking. Huntress' 24/7 SOC and threat hunters have your back, moving faster than the attackers, detecting their shady tradecraft, and containing and evicting them before any damage is done.

[+] Detection: (Built-in Logic)
Account Brute Forcing

| id | username | failed_login_count |
|------|--------------|--------------------|
| 4625 | "manager" | 288 |

RDP brute forced

Your best defense is a better offense.

Defensive depth to wreck ransomware
Ransomware doesn't just *happen*. It starts with initial access: employees, identities, infrastructure, and endpoints. You need defenses that cover all the entrance points. The Huntress Security Platform is the answer.

Human-led, 24/7 AI-assisted SOC
An always-on team of elite threat analysts is your force multiplier. We bring the fast, agile response you need to keep business going, protect your reputation, and rest easy knowing you're covered.

World-Renowned Threat Experts Seal the Gaps

Threat actors are super shady: they'll find gaps that others miss. Huntress' industry-recognized threat experts are always on the hunt, uncovering the latest tradecraft and finding and evicting the threats that get in and lay low until they ransom your business.

The **Huntress Security Platform** is your unfair advantage against ransomware

For every step the attacker takes, we're already there

Ransomware attacks happen in stages: Reconnaissance, Initial Access, Persistence, Data Exfiltration, and Ransom. Huntress is there at every stage, detecting, containing, and evicting hackers before they can ransom your business and shut it down. The combination of the Huntress Security Platform, backed by our world-renowned threat experts, hunters and analysts, have your back when attackers come knocking.

- All access vectors are covered across employees, identities, infrastructure, applications, and endpoints.
- Huntress' enterprise-grade solutions and Security Platform collect the right data to quickly detect and surface shady hacker activity across the network.
- Huntress' 24/7 AI-assisted SOC has your back, triaging suspicious activity, validating, and containing threats fast, then remediating and evicting threat actors before they can lock up your business.

Huntress has seen it all day in, day out. We make sure that all you see is business as usual.

Broad visibility gives you industry-leading ransomware protection.
