

The Huntress Security Platform

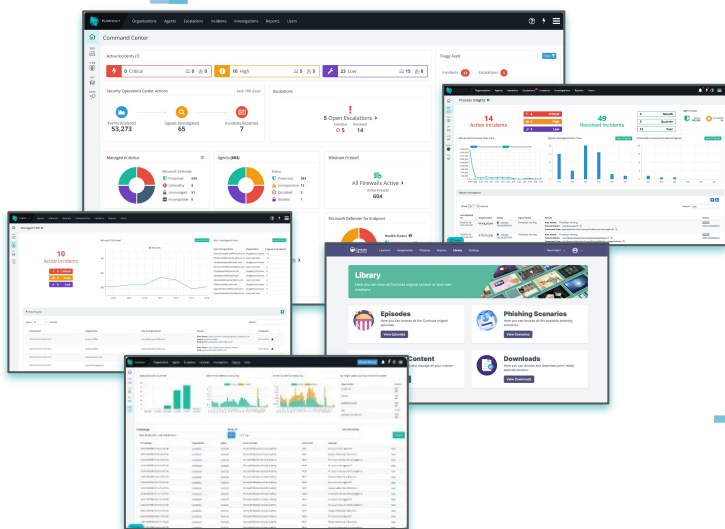

For Education

Keep Class in Session — Even When Attackers Won't Sit Still

The Huntress Security Platform delivers fully managed security solutions to protect your endpoints, identities, systems, and data across districts and campuses. This helps you keep learning on track and safeguard staff information, even when attackers target your environment.

Every Huntress solution is backed and operated by our 24/7, AI-assisted Security Operations Center (SOC) and powered by a team of world-renowned threat researchers, hunters, and analysts.

We're dedicated to stopping cyber threats before they can do damage, so K-12 districts and higher-ed institutions stay protected around the clock.

Managed EDR

Endpoint protection built for school.

Huntress Managed EDR continuously protects your endpoints with an 8-minute MTTR to find and stop attacks fast for schools, districts, and universities of all sizes.

Managed ITDR

Modern attackers don't need malware — just a login.

Huntress Managed ITDR detects and stops identity-based threats with a 3-minute response time and low false positives, helping protect faculty, and privileged accounts.

Budget-constrained schools can exclude eligible student licenses from billing and monitoring while focusing coverage on the identities that keep your institution running.

Managed SIEM

Threats evolve. Your SIEM should too.

With Smart Filtering technology, we collect only what matters—reducing noise and accelerating response. Our SIEM simplifies compliance and delivers protection at a predictable price so districts and universities address controls expected by cyber insurers and regulators, while still fitting tight budgets.

Managed Security Awareness Training (SAT)

Expert-backed training for safer teams.

Training content and simulations learners actually enjoy, managed for you to make administration easy. Powered by current threat intelligence, it helps teachers, staff, and even students recognize and report attacks so you see fewer security incidents.

The Huntress Difference

Built for you, fully managed by us

While other solutions expect you to do all the work, our fully managed products do the heavy lifting for you. Our 24/7 threat hunters monitor your environment and catch threats before they disrupt teaching, online testing, financial aid, or student services. We don't just alert you to threats; we wreck them and kick them out fast, giving you peace of mind.

World-renowned experts on your side

You shouldn't have to build a team of skilled security pros to protect your district or campus—that's our job. Huntress products are backed by the best security minds in the industry. Whether it's threat research, detection and response, or support, our experts have seen it all and stopped it all.

Speed, affordability, and simplicity without compromising quality

Huntress prioritizes ease of deployment, affordability, and simple pricing, delivering the tools you need to keep your institution protected without compromising on quality. We focus on providing real value, not inflating prices with unnecessary add-ons or service tiers. You get fast time-to-value with next-level outcomes and results.

“

Huntress notifies us, investigates, and remediates within minutes, and handles it all for us, before we even log into the platform. Knowing that there's a full team at Huntress that's monitoring my environment for me 24/7/365 means if something happens on Christmas morning, I don't have to drop everything.

Eric Nush, Director of Technology, Homer Community Consolidated School District 33C
