

# FASTER. COST EFFECTIVE. 100% AUDIT SUCCESS RATE.

Cloud Compliance for FedRAMP | DoW IL 4/5 | HITRUST

<b>100%</b>	<b>9-12</b>	<b>50%</b>	<b>AWS/AZURE</b>
AUDIT SUCCESS RATE	MONTHS TO AUTHORIZATION	FASTER TO MARKET	SUPPORTED PLATFORMS

Independent Software Vendors (ISVs) who provide solutions to the US Federal government, healthcare organizations, and other regulated industries are required to comply with rigorous cybersecurity standards. Project Hosts provides turnkey services to implement and manage compliance, ensuring the ISV's Software-as-a-Service (SaaS) solution passes required security audits and obtains a certification (or authorization) of compliance.

## HOW IT WORKS

# THREE PILLARS. ONE TURNKEY SOLUTION.

### COMPLIANCE INHERITANCE

Our pre-authorized GSSOne PaaS means your SaaS solution inherits the majority of required security controls from day one - deployed on AWS or Azure.

### COMPLIANCE MANAGEMENT

As an MSSP, our experts write your SSP, policies, and all required documentation - then continuously manage patching, log correlation, DR testing, and agency reporting.

### COMPLIANCE CERTIFICATION

We represent you through audits, secure your ATO from a federal agency, and guide oversight reviews with FedRAMP or DISA - end-to-end.

## OUR FASTTRACK PROCESS

- 01 Platform Onboarding**  
Connect your SaaS to GSSOne and inherit core controls.
- 02 Documentation and SSP**  
We write your Security Plan, policies, and all required docs.
- 03 Audit and Assessment**  
Our team coordinates directly with assessors on your behalf.
- 04 Authorization Granted**  
Receive your ATO and enter regulated markets.

## AUTHORIZATIONS AND CERTIFICATIONS
