

# Bring your Docebo learning content to life

Leverage Docebo training content and learning materials to their fullest potential with Class during virtual instructor-led training.

### Improve learner engagement

Deploy Docebo content in Class—validated by third-party research to improve learner engagement.

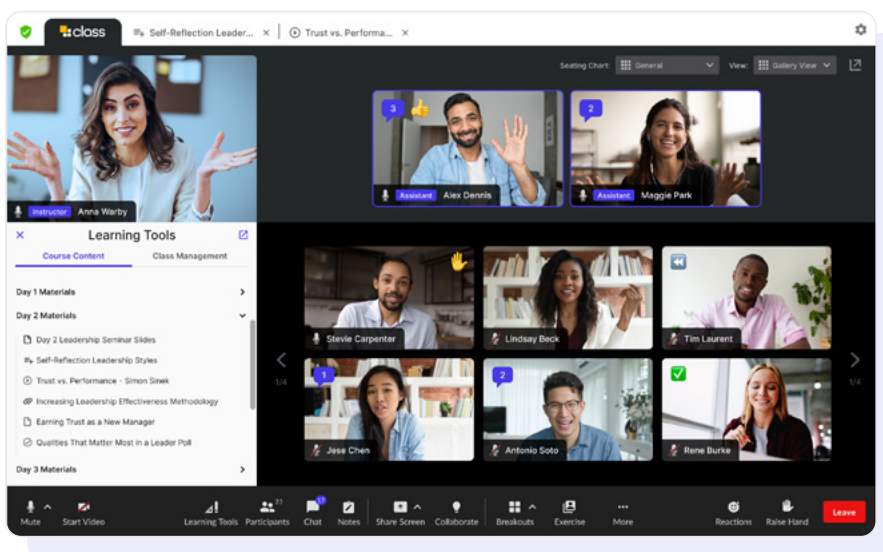

### Simplify instructional workflows

Synchronize important resources, like Docebo rosters and learning content, effortlessly into Class.

### Measure learner progress

Completed activities from live sessions in Class are automatically reflected in Docebo course reports.

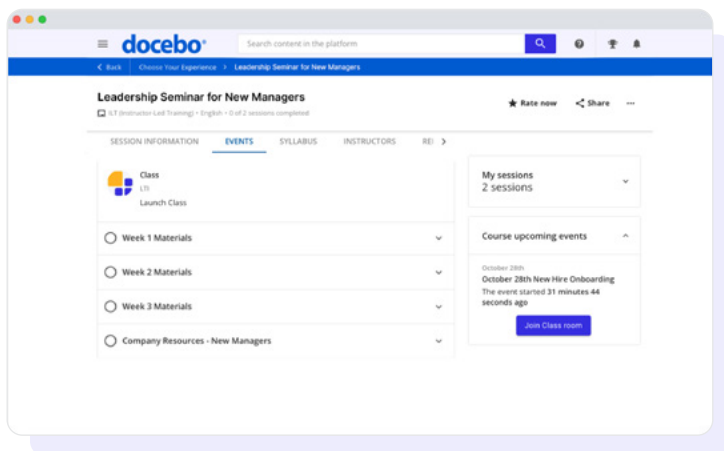

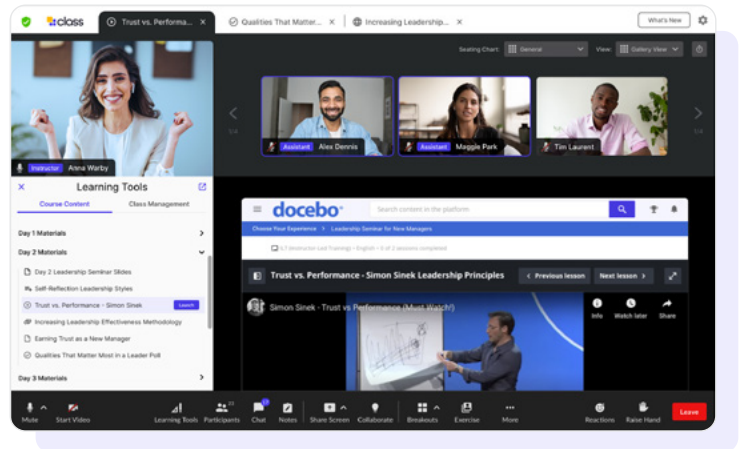

We are proud to partner with Class and bring our AI-powered learning platform's efficiency and automation directly to virtual classrooms. Together, we share a vision for a more learner-centric future of learning."

**Travis Burke**

Executive VP, Corporate Development & Partnerships, Docebo

## Engage learners with live interactive training

- Create active learning environments with breakout rooms, polls, and live discussions
- Track learner progress with real-time analytics and assessments synced to Docebo
- Ensure learners get the most from training with an intuitive and immersive experience

## Simplify instructor and administrator workflows

- Automate session enrollment and attendance tracking
- Maintain training records effortlessly within Docebo's LMS
- Optimize training efficiency with seamless and integrated workflows

## Measure learner progress and outcomes

- Gain real-time insights into learner engagement and knowledge retention
- Track training effectiveness with session analytics and reporting tools
- Use data-driven insights to continuously refine and improve virtual training programs
