

The virtual classroom built for financial services

Train your workforce with confidence—securely, consistently, and at scale. Class brings compliant, expert-backed virtual training to financial institutions with tools designed for engagement and results.

Built on platforms you know

Built on Zoom and Microsoft Teams, Class adds powerful instructor-led features to the platforms your team already uses—making adoption seamless.

Enterprise-grade security

Designed for highly regulated environments, Class is SOC II compliant and backed by third-party audits to keep your data secure and training compliant.

Consistent, scalable learning

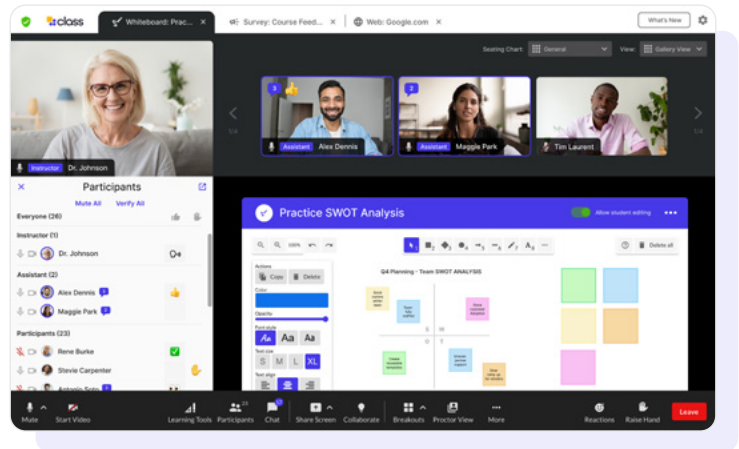

Deliver repeatable, high-quality sessions across your organization. Save time, stay compliant, and ensure every learner gets the same engaging experience.

How does Class compare?

		Class	Video conferencing
Before live virtual training Streamline course setup with templates and persistence	Sync your LMS, utilize course templates, and pre-configure breakout rooms to efficiently create courses that engage from day one and are persistent when you return.	✓	✗
During live virtual training Transform engagement and accountability with embedded tools	Enhance live instruction with embedded features designed for active learning. Monitor breakout rooms, guide individuals and measure their engagement in real-time.	✓	✗
After live virtual training Keep learning active with Interactive Playback and analytics	Improve the impact of your recordings with embedded polls and assessments. Leverage analytics on engagement and knowledge retention to inform better outcomes.	✓	✗
Foundations Utilize the baseline foundation required for instructor-led training	Secure, seamless access with built-in reliability, scalability, and accessibility, and core features like screenshare and chat. Class is built on Zoom and Microsoft Teams.	✓	✓

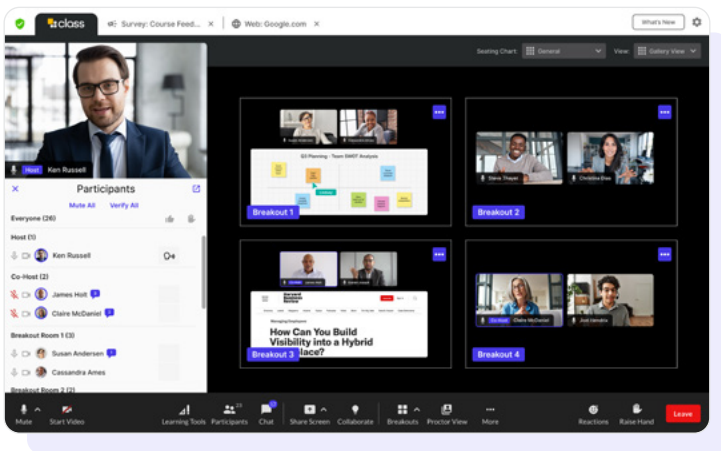

Drive deeper learning through real participation

Disengaged learners miss critical information, especially in complex or compliance-heavy environments. Class transforms virtual training into active learning that drives focus and accountability. Encourage teamwork with **live in-app document collaboration**, check for understanding with **quick polls** and **knowledge checks**, and reinforce learning in **breakout rooms with differentiated content**.

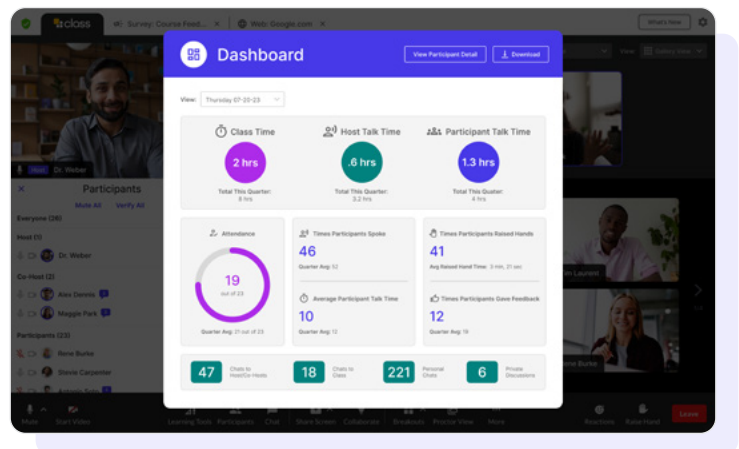

Consistent and scalable for distributed teams

Whether onboarding new hires, running compliance refreshers, or upskilling teams, Class helps you deliver standardized, repeatable sessions that save time and ensure consistency across your workforce. **Session templates**, **pre-built breakout rooms**, and deep **LMS integrations** make it easy to scale training across roles and regions.

Measure training impact with real-time insights

Guesswork doesn't cut it when compliance and performance are on the line. Class captures **participation, talk time**, and **engagement metrics**—giving you visibility into what's working, who's learning, and where to improve. Replace anecdotal feedback with clear, actionable insights that validate results, support targeted coaching, and drive meaningful professional development.
