

SHARESTREAM FOR TEACHING & LEARNING

Supercharge Student Engagement with Interactive Video

ShareStream brings interactive video and course media management together within a purpose-built solution for teaching and learning. It combines consumer-grade ease of use with a robust platform engineered to manage media at scale.

Promote Active Learning with Video Quizzing

Turn any video into an interactive quiz, boost knowledge retention with feedback tailored to each response, track student results in real time, and auto-sync scores to learning management system (LMS) gradebooks.

Roll Out a Video-Learning Solution Instructors Just Get

ShareStream simplifies the media workflows instructors use most—including batch-uploading media, generating captions, organizing course media, and publishing media to LMS courses—while focusing the instructor experience exclusively on features that support teaching.

Secure and Control Access to Instructional Media

In addition to standards-compliant LMS and single sign-on integrations, ShareStream provides robust digital rights management and permissions functionality that help instructional technology teams streamline and bolster access-control processes in accordance with institutional policies.

Since the launch of ShareStream at Georgetown University, we've been guided by our belief that the most meaningful breakthroughs happen when we partner with clients to achieve their goals. [Explore our latest product innovations >](#)

About ShareStream

ShareStream is a pioneer in online video and media management solutions for education and secure communications. Among other benefits, ShareStream enables organizations to enhance learner engagement, simplify video workflows, and manage media collections at scale.
