PDF ARCHITECT

Powerful, Flexible. Built for businesses.

PDF Architect is a business-grade PDF solution built to edit, convert, review, sign, and secure documents. Its modular design means you only pay for what you need - keeping workflows simple and cost-effective.

Avanquest

Why businesses choose PDF Architect, our all-in-one PDF editor:

- Edit, convert, annotate, and manage documents easily
- Streamline workflows for increased productivity and efficiency
- Scalable, affordable, and reliable licensing
- Group policy support & MSI deployment capabilities
- Centralized license management via our Admin Portal

Product editions

We offer two PDF Architect editions to choose from: Professional and Business. Each version is designed to build on the last, so you can start with the essentials and expand as your needs grow.

Edition	Core features
Professional	Full PDF control: create, edit, convert, and merge with ease. Includes password protection, form creation, AI translation & assistant, OCR, collaboration, and 50 E-signatures per year.
Business	All Professional features plus: **Unlimited digital signatures.**

Supported environments

- ☑ Desktop users
- ☑ Citrix / RDS / VDI
- ☑ Windows Enterprise Multi-Session

Who it's for:

- SMBs who use PDFs on a regular basis
- Corporate IT departments standardizing documents
- Legal, insurance, finance, education, and public institutions

Use cases

- Editing and updating contracts
- Securing and signing documents
- Converting to Office
- Merging and splitting various documents
- Using OCR to digitize and search scanned documents

Choose with confidence

Key differences at a glance.

PDF Architect offers all the essential PDF features SMBs need, without the price tag often associated with larger, less flexible solutions.

Feature	PDF Architect Business	Adobe Acrobat Pro
PDF editing & conversion	✓	✓
OCR included	✓	✓
E-signature integration	✓	✓
AI translation & assistant	✓	✗
Support & onboarding	✓	✗
IT Admin portal*	✓	✓
Pricing (annual subscription)	127 USD/year	287.88 USD/year

*Provides IT administrators full control over license management, user access, and permissions from one centralized dashboard.
