About QualityLogic

QualityLogic is a leading US software quality assurance and digital accessibility services firm with 7,000+ programs delivered successfully since 1986.

We empower prime federal contractors and the agencies they serve with innovative commercial best practices from Fortune 500 and high-profile startups alike.

Core Competencies

QualityLogic aligns with your processes and systems, not the other way around. We provide a full spectrum of QA and accessibility solutions, with expertise that encompasses a vast array of methodologies, technologies, systems, and industries.

- **QA Services:** Test documentation and automation, manual testing, load / performance testing, QA program management, and QA consulting
- **Accessibility Services:** WCAG 2.0-2.2, Section 508, and ADA compliance auditing, code and document remediation, usability and design reviews, VPAT documentation, training, and consulting
- **Methodologies:** Agile (e.g., Scrum, SAFe, and Kanban), Waterfall, and Hybrid
- **Systems:** Web, mobile, and desktop applications, GenAI and AI/ML applications, Internet of Things (IoT), augmented and virtual reality (AR/VR), cloud and on-premise solutions, and others
- **Technologies:** Technology-agnostic, with proficiency in all major programming languages, test automation frameworks, test tools, and software engineering tools
- **Industries:** Industry-agnostic, with specialization in healthcare, finance, and education, plus clients in the following NAICS: 22, 23, 31, 42, 44, 48, 51, 52, 53, 56, 61, 62, 71, 72, 81, and 92

QualityLogic at a Glance:

- 35+ years of specialized QA and digital accessibility expertise
- Certified small business with 150+ employees in 20+ US states
- Headquartered in Idaho, with offices in Oklahoma and California
- 98% customer satisfaction rate
- Primary focus on sub-to-prime services
- SOC 2 compliant and aligned with NIST SP800-30 rev. 1 and NIST SP800-53 rev. 5

Past Performance:

Our QA Work Sets Us Apart

QualityLogic's customers include government agencies, public organizations, and private companies in the US and around the world. Spanning a wide range of industries in multiple markets, our customers rely on our strategic guidance, software testing, and team of QA engineers for improved quality and more widely accessible software, websites, and mobile apps.

Mighty Networks | 2019 – 2023 | 35 FTEs

Provided QA strategy, manual testing, and test automation services to enable client to transition from ad hoc QA processes to agile and state-of-market CI/CD delivery with ~3,000 E2E automated tests, additional secured funding rounds, and successful meeting of growth targets.

Direct Care Innovations | 2017 – ongoing | 7 FTEs

QA strategy, manual testing, test automation, WCAG compliance, and business analyst services to support complex healthcare application development and successful custom implementations within state/local government for Medicare/Medicaid management.

Disney | 2002 – 2020 | 45 FTEs

Web and mobile application testing, analytics testing, and telemetry testing to support consumer streaming services and OTT technology, parks management and guest experiences, and online gaming. Services included supporting several major TV channels and content networks as well as advertising partners to ensure successful launches, quality releases, and reliable revenue.

Northwest Evaluation Association (NWEA) | 2018 – 2024 | 5 FTEs

Test documentation, manual testing, WCAG compliance testing, QA strategy in support of education assessment and proctoring software utilized across 50,000+ schools in 100+ countries. Critical part of delivery team to ensure successful releases and hotfixes.

University of Illinois | 2022 – ongoing | 4 FTEs

Digital accessibility auditing, document remediation, and training services to ensure University software systems fully meet ADA, Section 508, and WCAG compliance. Services are provided by subject matter experts including people with disabilities.

P.volve | 2020 – ongoing | 7 FTEs

Test documentation, manual and automated testing, WCAG compliance testing and consulting, QA strategy in support of video streaming and fitness applications. Responsible for providing full, turnkey QA department including executive leadership and test strategy, critical for ongoing development and successful launches.

City of Sioux Falls | 2024 – ongoing | 7 FTEs

Critical WCAG, ADA, and Section 508 compliance project to fully audit internally-developed and externally-procured websites, web applications, and mobile applications to ensure compliance with accessibility laws and standards. Support included professional auditing across JAWS, NVDA, VoiceOver, and TalkBack; producing VPATs for internal systems; reviewing vendor-supplied VPATs; and providing consulting/training to internal teams.

What Our Clients Say

“QualityLogic is highly efficient in their testing. Compared to other quality testing vendors we’ve had, **QualityLogic provides 10x the amount of work as other teams**. Given that, my internal team loves them. QualityLogic is the best QA team I’ve ever worked with—I’ve been doing QA work for 25 years, and I’m stunned at how good they are at their job. They have everything that we want in a QA team; they’re flexible and always maintain good quality.”

~ Scott Shea, Director of Quality Engineering at P.volve

“QualityLogic has been great in terms of project management. **They’re self-sufficient and incredibly flexible** in their ability to maneuver people to accommodate our needs. Their communication has been fantastic, and they’re very comprehensive. I’m most impressed with QualityLogic’s expertise in pure testing. That, combined with their excellent communication and the breadth of what they can test, really stood out to us.”

~ Eric Newman, Director at 10Pearls

QualityLogic is known for our technical expertise and high standards, but what really sets us apart is truly listening and adapting to your needs so we can develop solutions based on what works best for you, not us.

98%

**CLIENT
SATISFACTION
RATE**

Based on independent reviews from Clutch and GoodFirms

“**We saw a huge decrease in complaints after we brought QualityLogic onboard**, and we saw a big increase in the quality of our releases. It’s been a tremendous impact.”

~ Jason McGowan, VP Engineering at BrightLine

“**Without their help, we wouldn’t be able to achieve our needs**. They’re hard-working people who are dedicated. I don’t treat them as some third-party I’m working with. I treat them like part of our team. Our entire team treats them as partners. I would recommend them if anyone needed help testing their applications. I don’t have any hesitations.”

~ Gennady Stinerman, QA Manager at Spin

“QualityLogic created over 1,364 unique test cases, which approached a 95% test coverage of our app. QualityLogic definitely exceeded my expectations. The detail in their test cases was exactly the level of detail I would have done myself. To put this into perspective, I consider myself to be an obsessive-compulsive person when it comes to over-engineering test cases. **As a result of their thorough testing, we consistently held a bug escape rate of less than 10%**. A less than 10% rate was a good metric for escape bugs.”

~ Christopher Horvat, VP Engineering at Scythe

Partner with the Best

QualityLogic is your trusted subcontracting partner for secure, NIST-compliant QA and accessibility solutions tailored to federal agencies and primes. Reach out to us today to discuss your specific project needs.

As the largest pure-play testing company in the United States — and one of the most trusted QA companies — we have experience that other software testing companies simply can't match. We have worked on more than 7,000 successful QA programs and have earned a 98% satisfaction rating from our customers.

Schedule a conversation with our team of software QA and digital accessibility experts and let's explore your questions to discover how we can help you.
