

Shine a light on *student needs*.

Anticipate risk. Increase persistence.

Meet Beacon

Your intelligence platform to improve student retention

By focusing on the core pillars of student success—mental health, basic needs, and belongingness—Beacon identifies hidden stop out risks, early. It provides institutions with the population analytics to optimize resources, and students with immediate, high-impact support.

Beacon empowers institutions to proactively improve persistence through early alerts on individual students most at risk of stop out, ensuring more students reach the commencement stage.

Beacon Delivers

Increased student utilization of campus resources to improve student well-being

Improved student persistence through proactive, data-informed interventions at the individual level

Population- and subpopulation-level insights & trends for precise decision making

Analytics that identify institutional gaps and guide resource allocation for retention initiatives
