

GOVERNMENT TECHNOLOGY & MUNICIPAL AI

Modernize operations. Deliver better services.

Municipal AI solutions, technology advisory, implementation and managed services for state and local government, public utilities and special districts.

Government-first / Vendor-neutral / Integration-minded

Professional and managed services

Project management & business analysis

Governance, requirements, stakeholder alignment, schedules, risk management and delivery oversight.

Permitting & licensing

Selection, configuration, data conversion, testing, go-live, recovery and post-launch improvement.

AI strategy

Use-case selection, readiness assessments, responsible-use policies and AI governance.

Digital modernization

Process redesign, integration planning and technology change that supports essential operations.

Fractional CIO

Technology strategy, budgeting, sourcing, governance and vendor management.

AI & process automation

Workflow automation for approvals and service requests, with staff retaining decision authority.

Cybersecurity & digital resilience

Identity, data protection, privacy, compliance, threat management, continuity, recovery and assurance.

Application managed support

ERP and non-ERP administration, help desk, maintenance, upgrades, monitoring and vendor coordination.

Government payroll as a service

Managed processing, compliance, self-service, reporting and integration with ERP, HR, time and benefits systems.

Flexible engagement

Subscription, fixed-scope projects, time and materials, or managed services.

AI for everyday government work

Purpose-built solutions across finance, community development, resident services, records and governance.

FINANCE

InvoiceIQ AI

Invoice intake, validation, matching, approvals and ERP handoff.

FINANCE

BudgetLens AI

Budget analysis, forecasting, grant visibility and budget narratives.

COMMUNITY DEVELOPMENT

DocuPermit AI

Permit intake, document organization, extraction and completeness checks.

COMMUNITY DEVELOPMENT

PermitFlow AI

Permitting and licensing routing, approvals, notices and handoffs.

COMMUNITY DEVELOPMENT

PlanIQ

AI-assisted plan review with configured checks and staff validation.

COMMUNITY DEVELOPMENT

PermitTrack AI

Plain-language permit status, outstanding items and next steps.

COMMUNITY DEVELOPMENT

RentIQ

Rent stabilization inquiries, property context, correspondence and case history.

RESIDENT SERVICES

CivicAssist AI

Tracked resident requests across calls, forms and messages.

RESIDENT SERVICES

UtilityAssist AI

Billing answers, anomaly detection and utility service routing.

RESIDENT SERVICES

CivicVoice AI

Conversational voice service with routing and human escalation.

RECORDS & GOVERNANCE

CouncilBrief AI

Source-grounded briefings and search across agenda materials.

RECORDS & GOVERNANCE

RecordsIQ AI

Permission-aware records search, answers, summaries and citations.

Connected to your environment

Work alongside ERP, permitting, finance, GIS, CRM, records and document systems. Integration scope depends on available interfaces and authorized data access.

Security and staff oversight

Role-based access, SSO and MFA readiness, secure data handling, logging and human review. Authorized staff retain decision authority.

Let's discuss your next initiative.
